Problems:

1. A is bound to fight 40 days for the King. He is obligated to bring his vassals C, who is to bring F. But sometimes A fights against the King, and C is obligated to go with A., and F with C to fight against the King too.
2. F vassal of both C & D, holds part of his manors as a fief from D & the rest from C. What will F do if C makes war on D?
